BIO-YOUTOON

This is a 24-month collaborative project called "Raising Youth Awareness of Biodiversity Conservation via Webtoon". It aims to raise awareness and support education among young people on the importance of biodiversity. It also aims to create a platform for projects involving young people in biodiversity conservation activities by facilitating collaborations between young civil society organizations and young researchers. The idea for the project came out of the idea that in recent years there has been a growing awareness that humanity needs to take important steps in the field of environment. The main goal is that biodiversity has many functions on Earth, such as maintaining the balance of the ecosystem, recycling and storing nutrients, combating pollution, stabilizing the climate, protecting water resources, creating and protecting soil, and maintaining ecobalance.

OBJECTIVES

- Developing skills/methods/knowledge on biodiversity among youth and youth civil society organizations
- Youth workers/trainers learn how to integrate environmental sustainability education activities into their work
- Strengthening the science communication skills of young researchers and contributing to knowledge production
- Developing concrete methodologies to facilitate cooperation between youth NGOs and young researchers on biodiversity.

Thus, our project also contributes to Article 10 of the Convention on Biological Diversity (Article 10: Strengthening formal and informal education on biodiversity).

RESULTS

E-Book for BioYouToon
BioYouToon Toolkit
BioYouToon Comics

RESULTS

E-BOOK for BIOYOUTOON

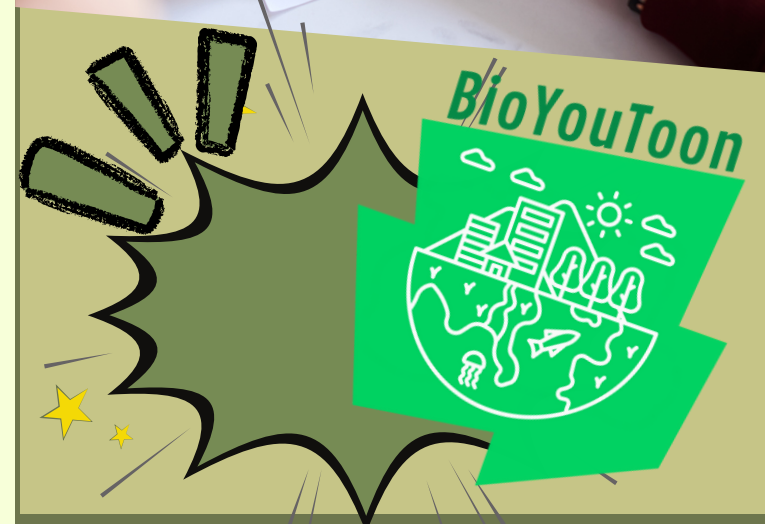

The e-book is designed as a practical guide including the Consortium level Research Report, the Training Methodology for engaging young people in biodiversity conservation activities and the Joint Staff Training report.

BIOYOUTOON TOOLKIT

It includes an e-learning platform developed through a co-design process between Youth workers and trainers involved in the Joint Staff Training.

BIOWEBTOON COMICS

It will be co-created by the young people involved in the local activities and the partner organization.
